

Accessibility & Privacy Statements for Course Technologies

The Citadel is committed to safeguarding and maintaining the privacy of student's personal information and creating a fully accessible learning environment. The following technologies may appear in our online, hybrid, or face-to-face courses.

Students are not required to share information of a personal or private nature to accomplish any course requirement. However, if students participate in class activities using social media and/or third-party software, they should be aware that their information may not be protected.

Instructors, please contact the Center for Excellence and Innovation in Teaching, Learning and Distance Education at ceitlde@citadel.edu if there are any course technology accessibility and privacy statements in need of corrections or that need to be vetted.

For each technology, click the links below to view the accessibility or privacy policy statements or websites:
